

INVOICED (AGB)

29/05/2026

Ascension Saint Thomas Behavioral Health Hospital calculates a single percentage of the Generally Billed Amount (AGB) using the "prospective method," based solely on Medicare-fee-for-service, pursuant to Section 1.501(r)-5(b)(3), Section 1.501(r)-5(b)(3)(ii)(B), and Section 1.501(r)-5(b)(3)(iii) of the IRS Regulations. Details of such calculation and the AGB percentage are described below.

The AGB percentage is calculated by the hospital using the same billing and coding process that it would use if the person eligible for the Financial Assistance Policy (FAP) were a fee-for-service Medicare beneficiary for any emergency care or medically necessary care. The hospital will set the AGB for the health care in the amount it determines to be the total amount Medicare would allow for such care (including both the amount that would be reimbursed by Medicare and the amount that the beneficiary would be responsible for paying personally in the form of copayments, coinsurance, and deductibles).

The calculation for the year ended December 31, 2025 is 37.43%
